USE Homasote Products on Your Next Project or The Tree Gets It

Since 1909, Homasote building products have been made from recycled post-consumer wastepaper. Keeping millions of trees from being cut down, Homasote offers Structural Roof and Floor Deckings, Sound-Deadening Wall and Flooring Products, and Decorative Interior Wall Panels. For more information, call Homasote at 800-257-9491 today. And the tree lives.

RE: Building Material Content Transparency

Dear Building Material Manufacturer Representative:

Yost Grube Hall Architects (YGH) is dedicated to providing a transparent and informed decision-making process for our clients, society, and environment. We are committed to responsibly sourcing materials for our projects.

YGH's approach to building material transparency aims to provide our clients with the highest level of transparency and to ensure that our projects are built using environmentally sound materials.

Product manufacturers play a vital role in this process.

We are inviting you to share information about your products to help us make informed decisions. Your participation is essential to ensuring that our projects meet the highest standards of sustainability and environmental responsibility.

Thank you for your cooperation and commitment to sustainable building practices.

Sincerely,

[Signature]

RE: Transparency and Health Product Declaration

Dear [Name],

Perrins+Will believes that products that are transparent to their projects and the public, and that are subject to informed decision making, will result in better projects.

We are inviting you to participate in the Health Product Declaration process, which is being developed by the International Living Future Institute. The Health Product Declaration (HPD) is a transparent, verifiable, and verifiable system for documenting the environmental and health impacts of building materials.

By participating in the HPD process, you will be able to communicate the environmental and health impacts of your products to architects, designers, and other stakeholders.

Thank you for your cooperation.

Sincerely,

[Signature]

RE: Transparency and Chemicals of Concern

Dear Product Manufacturer:

Sasaki Associates is committed to making informed decisions regarding the building materials used in our projects. We are a long-standing leader in incorporating environmental and health considerations into our designs.

The Health Product Declaration is an essential tool for achieving this goal. It allows us to evaluate the health impacts of materials used in our projects and to make informed decisions.

Complying with the Health Product Declaration is an important step in ensuring the health and safety of our clients and the communities in which they live.

By participating in the Health Product Declaration process, you will be able to communicate the environmental and health impacts of your products to architects, designers, and other stakeholders.

Thank you for your cooperation.

Sincerely,

[Signature]
